

Willian Bittencourt Ribeiro

Front-end Engineer

✉ willianribeiro.contato@gmail.com 📍 São José dos Campos, São Paulo, Brazil

in <https://www.linkedin.com/in/wwillianribeiro> 🖱 <http://willianribeiro.com.br>

KEY SKILLS

JavaScript • Vue • React • HTML • CSS • Jest • Webpack • Python
Django • Git

PROFESSIONAL EXPERIENCE

Buser (4 years)

Frontend Engineer

Jan 2020 – Dec 2022

Remote, Brazil

The company expanded the team, allowing me to refocus on front-end development. During this time, I worked on the company's primary application (ticket reservation). Some highlights:

- I worked in the initial construction phase of the Design System
- Implemented the first structured data to improve the site's SEO

Software Engineer

Dec 2018 – Dec 2019

Brazil

I started working as a Software Engineer, solving any kind of problem that appeared, either on the front-end or the back-end. I worked building the beginning of the 4 main applications of the company (the bus ticket reservation application and 3 other back-office tools), all developed using Python, Django, Vue.js and NuxtJS.

When I arrived at the company there were less than 50,000 users which then grew to 9 million. At Buser I learned how to build large-scale software and how to work in a large and distributed team.

Gauge (2 years), Frontend Engineer

Dec 2016 – Dec 2018

Brazil

I was hired to start the front end of a new company product: a customer service application. It was from this challenge that I learned to think about software architecture and to make technical decisions.

- I built the entire front-end architecture of the application from scratch (using React and Redux).
- I built, also from scratch, a React library of UI components (Design System).

Kenoby (8 months), Frontend Developer

Aug 2015 – Mar 2016

It was a period where I wrote a lot of code in JavaScript and AngularJS. Whether in the previous company I built a strong knowledge of CSS, Kenoby was where I built a strong knowledge of JavaScript.

Remote, Brazil

Eduqo (2 years)

Frontend Developer

Jul 2014 – Jun 2015

Eduqo is where I built a strong working knowledge of CSS and how to create "bulletproof" UI components.

Brazil

- We refactored all the application's legacy CSS code. It reduced the time to implement new features by 50% and eliminated bugs caused by CSS.
- We make responsive all pages of the application for work on mobile devices.

Frontend Developer Intern

Aug 2013 – Jun 2014

Brazil

Funcate (1 year), Software Developer - Internship

Aug 2012 – Jul 2013

- I developed a web application for time and attendance from scratch
- I worked on a desktop application used for land demarcation on a map

Brazil

EDUCATION

Technology Degree in Systems Analysis and Development, Fatec São José dos Campos

2011 – 2016

- Grade Point Average (GPA): 8.41/10
- I was a member of the winning team of the ACM-ICPC programming marathon (2012), regional stage (<http://bit.ly/2blc1i5>).

Technical Course in Java, ETEC - Escola Técnica Estadual de São Paulo

Jan 2011 – Jun 2011

Specialization in Java and object-oriented programming.

Technical Course in Computer Science, ETEC - Escola Técnica Estadual de São Paulo

Jan 2009 – Dec 2010

- Project: developed a real estate management system.
- Skills: Java, Pascal and Delphi.
